MFR by JNMcMahon

McGeorge Bundy on behalf of Dean Rusk asked the Agency to supply answers to following questions: (within a half hour).

- 1) How important is it to our intelligence objectives that we overfly Cuban soil?
- 2) How much would our intelligence suffer if we limited our reconnaissance to peripheral activity utilizing oblique photography?
- 3) Is there anyone in the planning of these missions who might want to provoke an incident?

Dr. Scoville, when informed of the above, said we should not let Hilsman (State I&R) give our answers to Bundy but should send our own paper stating COMOR's views. Scoville said he would discuss with Mr. Reber.
